Food Grade White Grease #1

TECHNICAL DATA SHEET

BENEFITS

- Water resistant
- Pure and sanitary
- Resists separation and thinning
- Effective at temperature extremes to 500°F
- Non toxic

GENERAL INFORMATION

Exhibits excellent shear and mechanical stability and is readily pumpable. It does not become soft or run off and is effective to 500°F, which provides excellent service at food processing temperatures. Being clean, pure and non toxic, it is safe for all sanitary applications. It is superior to conventional food machinery greases. Superior in operation and is particularly useful in both hot and cold environments. It exhibits exceptional water resistance and lubricity. It is rust and oxidation inhibited and does not discolour or oxidize in normal service load conditions.

COMPOSITION

USP white mineral, extreme pressure additives, aluminum thickening agents, anti-oxidants, anti-corrosion additives.

TECHNICAL SPECIFICATIONS

NLG1 Grade:	#1
Dropping Point °F:	470°
Viscosity Index:	95
Colour:	White
Pour Point °F:	0°
Core Penetration:	310 – 340
Water Washout:	175°F % Max 10
Temperature:	to 500°F
Thickener:	Aluminum Oxide
Appearance:	Tacky

Food Grade White Grease #1 is available in these sizes:

Part # 66501 10 x 400 gram cartridge
