Salt Shield

TECHNICAL DATA SHEET

BENEFITS

- No harsh chemicals or health hazards
- Biodegradable
- Proven effective
- Unique organic bonding chemistry for removal of salt from surfaces

GENERAL INFORMATION

Salt Shield can be used for rinsing ship board surfaces, all municipal salt equipment, trucks and trailers or any surfaces which require salt removal. The electrochemical bonding of soluble salts to substrates is very difficult to remove. Salt Shield strips chlorides and sulphates from surfaces by using ionization energy to remove corrosion causing salts and leaves the surface with a temporary corrosion preventative layer on the surface.

APPLICATION:

Concentrated. Dilute up to 1 to 512 with water.
Do not rinse off with water or corrosion inhibition is reduced.
Protects aluminum, copper, brass, and mild steel.

TECHNICAL DATA

pH: 6.0 – 7.0 at use dilution
Colour: Amber

Salt Shield is available in these sizes:

Part # 27104 4 L jug
Part # 27120 20 L pail
Part # 27145 205 L drum

Proudly  Canadian
