## TOP-IT – Tabletop Saw and Tool Surface Treatment

# TECHNICAL DATA SHEET

### BENEFITS

- Easy to apply
- Reduces sliding friction and binding
- Inhibits corrosion and rust
- Dries in seconds
- No silicone
- High heat stability

### GENERAL INFORMATION

Regular maintenance of saw tables and receiving tables with Top-It reduces the binding of wood and hang-up. This product may also be used for protecting hand tools, equipment and vehicles against rust and corrosion.

### DIRECTIONS

Saw tables: Ensure that Top-It is applied on a clean surface. Use suitable degreaser if required. Spray a thin, even coat over the entire surface, including table to slides and fences. Allow to dry. Rub in lightly with a clean, dry cloth.

For even better results reapply a second coat and buff lightly.

Reapply weekly or more based on workload.

Tools: Apply thin film over tool surface. Allow to dry. Buff to a shine. Reapply as needed.

### TECHNICAL DATA

Colour: Clear transparent  
Temperature Range: 20°F to 550°F  
Silicone free

Top-It is available in these sizes:

Part # 67514 305 g (14 oz) aerosol
